

Monitoring & Targeting

Optimise Resource

Identify, achieve and most importantly, maintain best practice energy management.

Avoid Waste

Alert to increased energy use due to technical faults or wasteful behaviour.

Monitor Impact

Assess whether your energy reduction measures are making the predicted savings.

Stark's Monitoring and Targeting service combines our industry leading data quality and analytical expertise to **transform data overload into actionable insight**. It offers both energy managers and non-energy professionals **cost effective support for managing energy**.

Analysis

- Review performance and the impact of factors driving energy use
- Benchmark sites and feedback findings from initial analysis

Target setting

- Calculate targets based on historical data or other driving factors
- Set challenging but achievable targets that drive continuous improvement

Monitoring

- Alert to atypical energy use so corrective action can be taken
- Communicate the right information, to the right people, at the right time

Our Service

If your organisation has key contacts across multiple sites, **exception reports** alert site contacts the day after consumption exceeds set targets enabling them to resolve the cause of waste.

Performance trackers summarise exceptions triggered across multiple sites alongside key performance indicators. This allows a single contact to review large portfolios and easily identify poor performing sites.
